

QUALTER HALL

INTEGRATED ENGINEERING SOLUTIONS

**Waterway infrastructure,
flood control and port
and harbour facilities**

Our specialist, multi-disciplined team supports every element of the project lifecycle from initial concept to final commercial operation and aftermarket service.

Our UK site offers production facilities spanning over 10,000 square metres to manufacture full turnkey solutions.

New equipment and upgrade, refurbishment and maintenance of existing assets:

- **Water infrastructure (waterways, harbour, port and marine)**
- **Flood defence and control**
- **Shipyards facilities**
- **Road and transport**
- **Bespoke manufacturing**

**TEAM2100
Integrated Delivery
Partner**

- **Lead M&E contractor**
- **Working on 8 River Thames flood defence barriers**

Qualter Hall is a Mechanical, Electrical, Instrumentation, Control and Automation (MEICA) specialist with extensive experience gained through involvement in multiple UK flood control, waterway, port and coastal projects spanning several decades. Our work includes:

- **Slipway hoist and linkspan systems**
- **Roll-on/roll-off ('RoRo') systems**
- **Moving bridges**
- **Mitre, sector, sluice and radial gates**
- **Tidal and vertical lift barriers**
- **Stoplogs**

Environment
Agency

"The Environment Agency have just completed the £10M refurbishment of the Hull Tidal Surge Barrier. Qualter Hall were instrumental in making this exceedingly complex project a success.

Qualter Hall delivered in an extremely professional manner during the design, fabrication, testing and construction phases. They understood the importance of strong commercial control with good health and safety performance. There was a good appreciation of the client's needs, a refreshing ownership of issues and a willingness to work with the integrated team to deliver a top class job, often in challenging circumstances. They certainly engendered the partnering ethos required to complete this project on time and within budget."

Projects Team Manager
Environment Agency

**HUGH
SMITH**
Part of Qualter Hall

**Specialist in
shipyard presses, benders,
rolls and edgemills.**
